Critical thinking is an essential skill that should be looked into a multifaceted way. It is a highly desirable skill and plays an important role in education sector. It should be best conceived to excel and to be successful in any walks of life. Students with critical thinking skills become more independent and self-directed learners. In the context of NEP 2020, critical thinking can promote social transformation and democracy in Indian education.

Conference Outcomes

- To promote in defining and advancing the principles and best practices of critical thinking in education and society
- To enhance teacher’s ability to more substantively foster it in the classroom
- To establish rigorous standards of excellence in research findings
